PROFILE

iOS Developer building native apps with Swift, SwiftUI, and UIKit. Background in backend engineering — APIs, databases, system design. Started iOS development independently in 2024 and shipped **3 apps to the App Store**, all built alongside full-time employment.

IOS PROJECTS

PARKinPL

App Store · apps.apple.com/us/app/parkinpl/id6756267697

Native iOS app for finding paid parking zones in Polish cities. Works fully offline — no backend, no data collected.

- All zone data processed on-device via CoreLocation and MapKit — no API calls, no internet required after install
- GPS zone detection across 6 cities: Warsaw, Kraków, Wrocław, Katowice, Łódź, Poznań
- No ads, no accounts, no tracking — privacy by design

Challengers

App Store · apps.apple.com/pl/app/challengers/id6758675338

Goal-competition iOS app — set challenges across fitness, diet, sleep, or daily habits, invite friends as rivals, and track consistency through real-time rankings, streaks, and heatmaps.

- Led the full project — design, architecture, development, and App Store release — as sole developer
- Real-time challenge sync across users via Firebase, with Combine driving reactive state throughout
- Built GDPR-compliant from the ground up — no third-party tracking, data stays on-device where possible

Dev60s

App Store · apps.apple.com/pl/app/dev60s/id6757722658

iOS quiz app for technical interview prep — 60-second questions across Swift, iOS, and CS topics.

- Timer logic and answer evaluation built with Combine, managing UI state reactively without UIKit lifecycle coupling
- Multiple difficulty levels, haptic feedback on each answer, and a per-session results breakdown

EMPLOYMENT HISTORY

Data QA Analyst, Telus Digital

Kraków, Poland

Oct 2024 – Present

- Developed and shipped 3 iOS apps to the App Store independently alongside this role
- Reviewing and validating datasets for ML model training, maintaining 95%+ accuracy across all batches
- Applied structured QA workflows to catch and resolve labeling inconsistencies at scale

Full-Stack Developer Intern, Avelinix

Kraków, Poland

May 2024 – Aug 2024

- Developed full-stack features end-to-end — REST API design in NestJS through to UI integration in React — using TypeScript throughout
- Shipped production-level code across the entire stack within a 3-month engagement

Career Break · Personal Travel · Jan 2023 – Apr 2024

Backend Developer, FlareLane

Seoul, Korea

Sep 2021 – Jan 2023

- Designed and built 30+ REST APIs — including a real-time payment API — cutting transaction latency by **40%**
- Integrated MySQL and MongoDB (~**25%** retrieval time); added Elasticsearch, cutting search latency by **50%**
- Grew test coverage from **17% to 82%**, significantly improving release confidence
- Part of the core team during the company's **\$1M pre-Series A** raise

Backend Intern, Shipda

Seoul, Korea

Mar 2021 – Aug 2021

- Built the initial backend infrastructure and core REST APIs using NestJS
- Wrote the first test suite for the product, establishing a reliability baseline

EDUCATION

B.Sc. Computer Science (Mobile & Cloud)

Oct 2023 – Mar 2026

WSB University, Poland · Full-time

SKILLS

iOS Swift · SwiftUI · UIKit · Combine · CoreLocation · MapKit · Firebase · MVVM · Xcode

Backend NestJS · TypeScript · MySQL · MongoDB · Elasticsearch · REST APIs

Tools Git · React

LANGUAGES

Korean Native · **English** C1
